

Construction e-Learning Centre

INDUSTRY-DEVELOPED, INDUSTRY-APPROVED TRAINING INNOVATIONS

Course description

Developing Worksheets for Technical Training

SUMMARY

Developing worksheets is one way that instructors can supplement technical training materials and provide practice opportunities for apprentices who are struggling with technical training.

DESCRIPTION

This course will show instructors how to build worksheets to optimize learning opportunities for apprentices. Instructional ideas include how to use examples and answer steps to teach apprentices strategies for solving numeracy problems, and how to teach apprentices about document structure so they understand how to locate information in drawings, tables, and diagrams. Worksheets designed by instructors from various construction trades are included as examples.

OBJECTIVES

When you have completed the Developing Worksheets for Technical Training Course you will:

- Understand the value of teaching Essential Skills in technical training,
- Learn to assess Essential Skill levels of apprentices to determine instructional goals,
- Learn about the value of teaching document structure and features,
- Learn about teaching Essential Skills strategies,
- Learn Essential Skills strategies that can help to teach concepts.

AUDIENCE

This course is intended for technical training instructors.

COURSE LENGTH

The course duration is approximately 2 hours.
